

Care Factor Computer Services

Care Factor Computer Services Inc. (Care Factor) is an IT Infrastructure Solutions provider headquartered in Calgary, Alberta, Canada. In the past several years, Care Factor has broadened its mandate to focus on delivering unparalleled business value to our clients across the entire IT value chain. Care Factor's mission is to be the leading provider of integrated IT solutions for our clients - with focus on four key solution sets, namely Data Center Solutions, Managed Services, Business Continuity and eSecurity Solutions

Citrix

Citrix is the global leader and the most trusted name in application delivery infrastructure. More than 200,000 organizations worldwide rely on Citrix to deliver any application to users anywhere with the best performance, highest security and lowest cost. Citrix customers include 100% of the *Fortune* 100 companies and 99% of the *Fortune* Global 500, as well as hundreds of thousands of small businesses and prosumers. Citrix has approximately 6,200 channel and alliance partners in more than 100 countries.

CommVault

CommVault is the only software company focused exclusively on data management, and their approach refers to the use of one efficient, scalable data management product to perform a complete range of data management functions. The software uses an expandable range of application modules, sharing a single set of back-end services, to deliver leading-edge functionality that truly unifies and simplifies enterprise data management and maximizes cost effectiveness. This helps control the growth and cost of storage; avoid and reduce capital expenditures; speed backup and recovery; enable easy data archive; maximize the use of your storage devices and networks; gain time and cost-savings efficiencies; avoid the need for additional purchases of devices; maximize tape and disk use; and plan ahead for storage.

Data Domain

Data Domain systems identify redundant files and data as they are being stored, creating a storage footprint that is up to 20x smaller than the original dataset. Originally an ideal solution for backup and disaster recovery applications, customers are now deploying Data Domain de-duplication storage more broadly as a storage tier including near-line file storage, backup, disaster recovery (DR) and long term retention of enterprise data for reference, litigation support and regulatory compliance. As enterprise data continues to expand exponentially, customers face the costly challenge of storing and managing all that information. Data Domain helps enterprises continue to realize dramatic cost and efficiency improvements; minimize reliance upon tape technology; and meet stringent DR guidelines.

Ergotron

Founded in 1982 by VESA FDMI standard author and visionary Harry Sweere, Ergotron has been improving the human interface with digital displays for over 25 years. Our history of innovation and passion for differentiation is evidenced in over 35 patents and our growing portfolio of beautifully designed mounting and mobility products for computer monitors, notebooks, and large flat panel displays and TVs that are as easy to use as they are to mount. Ergotron's mounting solutions includes wall and desk mount arms, desk stands, carts and vertical lifts. High-quality products offered at an exceptional value are the hallmark of Ergotron. Headquartered in the United States, Ergotron has a division and four subsidiaries in Europe, and is represented in 67 countries worldwide.

F5

People rely on business applications delivered by networks, running everything from e-mail to Web pages to customer orders. But as businesses try to do more with their applications, complexity often increases to the point that networks and applications stop working. F5 makes all your applications work using a single, universal platform. This shared product platform provides a highly modular architecture that helps administrators take control of applications and keep them secure, fast, and available. This interface gives extraordinary flexibility and control over applications and devices.

Hewlett-Packard

HP is a technology solutions provider to consumers, businesses and institutions around the world. HP has an extensive network of dealers and authorized service personnel. HP delivers solutions for consumers, enterprises and small to medium businesses, and explores how technology and services can help people and companies address their problems and challenges, and realize their possibilities, aspirations and dreams. The goal of HP is to create more simple, valuable and trusted experiences with technology, continuously improving the way consumers live and work. From infrastructure and business offerings that span from handheld devices to some of the world's most powerful supercomputer installations, HP offers consumers a wide range of products and services in a comprehensive portfolio that helps to match the right products, services and solutions to a customers' specific needs. No other company offers as complete a technology product portfolio as HP.

IFS

IFS is a global enterprise applications company which provides software solutions that enable organizations to become more agile. Founded in 1983, IFS pioneered component-based enterprise resources planning (ERP) software with IFS Applications, now in its seventh generation. IFS' component architecture provides solutions that are easier to implement, run, and upgrade, and that give companies the flexibility to respond quickly to market changes, new business opportunities, and new technologies. IFS has a solid, growing presence in the North American business software market. IFS North America serves medium-size to large companies in a variety of key industries, including aerospace and defense, industrial manufacturing, automotive, high-tech, construction, and process industries such as food and beverage. IFS combines a global product and organization with local support for its customers. IFS North America is headquartered in Chicago, with major offices in Milwaukee; Raleigh, North Carolina; San Jose, California; Tucson, Arizona; Toronto; and Mexico City. IFS also has a large virtual organization to bring the company even closer to its customers while providing a better quality of life for its employees.

Intel

Intel pushes the boundaries of innovation so our work can make people's lives more exciting, fulfilling, and manageable. And our work never stops. We never stop looking for the next leap ahead—in technology, education, culture, manufacturing, and social responsibility. And we never stop collectively delivering better solutions with greater benefits for everyone.

Novell

Novell delivers infrastructure software for the Open Enterprise. Novell is a leader in desktop to data center operating systems based on Linux and the software required to secure and manage mixed IT environments.
